1.2 - STATISTICS

Paris, 1998, Bilingual

Paris, 1996

Paris, 1994

These annual publications set out the main statistical data concerning the transport sector in the Member countries of the ECMT. They begin with a summary of the main sectoral trends, and then provide a wide range of statistical data on such topics as investment, infrastructure, rolling stock, human resources, traffic and energy consumption for the different modes of transport, with the exception of air traffic.

Published from 1982 to 1998. Before 1982, the data were presented in the ECMT Annual Report.

Trends in the Transport Sector, 1970-2005
Paris, 2007, Brochure
(74 2007 03 1 P) ISBN 978-92-821-0118-6

Trends in the Transport Sector, 1970-2004
Paris, 2006, Brochure
(75 2005 03 1 P) ISBN 92-821-2349-9

Paris, 2005, Brochure
(75 2005 02 1 P) ISBN 92-821-0335-8

Paris, 2004, Brochure

Paris, 2003, Brochure

Paris, 2002, Brochure

These annual publications provide details of the main developments in the transport sector over the past year and graphically illustrate with charts and diagrams the main changes which have taken place since 1970.

Published since 1977
Paris, 2003, Bilingual
(75 2003 01 3P) ISBN 92-821-0299-8

Statistical Report on Road Accidents 1992
Paris, 1994
out of print

Statistical Report on Road Accidents 1991
Paris, 1993
out of print

The reports record the trends in road accident statistics over the past year in the ECMT Member and Associate Member countries. They also provide data on the trends since 1975 in numbers killed, casualties (killed and injured), accidents causing casualties in these countries -- taken both individually and as a whole -- and set out a number of factors to be taken into account in any analysis of the situation.

Published since 1984
Before 1984, the data were presented in the ECMT Annual Report

Glossary for Transport Statistics
Document prepared by the Intersecretariat Working Group UNECE, EUROSTAT, ECMT
Also available in Russian

This glossary was jointly compiled by ECMT, EUROSTAT and UN/ECE and covers infrastructure, transport equipment, transport enterprises, safety, traffic, transport measurement and energy consumption for inland transport. It provides standard definitions for statistical terms.

1.4 - RESEARCH ON TRANSPORT ECONOMICS

Paris, 2000, Bilingual
(74 2000 01 3 P) ISBN 92-821-0266-1 out of print

Paris, 1999, Bilingual
(74 1999 01 3 P) ISBN 92-821-0250-5 out of print

Paris, 1998, Bilingual
(74 98 01 3 P) ISBN 92-821-0236-X out of print

Paris, 1997 out of print

Paris, 1996 out of print

This annual Bulletin, produced by the ECMT Documentation Centre, presents a survey of current research on the social and economic aspects of transport in over 400 specialised agencies which are mainly European but in some cases American, Canadian or Australian. This survey enables specialists to ensure greater co-ordination of their work and provides the public with a means of monitoring trends in research in transport economics.

Published annually from 1969 to 2000

Last revised March 2010
1.5 - SYMPOSIA

Organised every three years by the ECMT, the Symposia aim to stimulate further thinking on the part of decision-makers, operators and researchers on themes of both current and future relevance to transport economics. The publications based on these symposia include reports and a synthesis of the debates.

16. **50 Years of Transport Research: Experience Gained and Major Challenges Ahead**
16th International Symposium on Theory and Practice in Transport Economics, Budapest, 29-31 October 2003

   Topic 1: Transport and Economic Growth: Which Interdependencies?
   Topic 2: Competition and Regulation: Substitutes or Complements?
   Topic 3: Sustainability of Transport: the Roles of Modal Split and Pricing

Paris, 2005
(75 2005 05 1 P) ISBN 92-821-2333-2 € 130

15. **Key Issues for Transport Beyond 2000**
15th International Symposium on Theory and Practice in Transport Economics, Thessaloniki, 7-9 June 2000

   Topic 1: Scenarios, Forecasts and Data Collection: Experience and Prospects
   Topic 2: Transforming Economic and Institutional Structures and Technological Trends
   Topic 3: Peripherality and Pan-European Integration: Experience and Prospects

Paris, 2002
Download

14. **Which Changes for Transport in the Next Century?**
14th International Symposium on Theory and Practice in Transport Economics, Innsbruck, 21-23 October 1997

   Topic 1: What is the future for transport?
   Topic 2: What role for government?
   Topic 3: What type of infrastructure?
   Topic 4: Scope for change

Paris, 1999
Download

Paris, 1999
Download

Transport Economics: Past Trends and Future Prospects
Report of Round Table 100, Paris, 2-3 June 1994
Paris, 1995
out of print
This glossary was jointly compiled by ECMT, EUROSTAT and UN/ECE and covers infrastructure, transport equipment, transport enterprises, safety, traffic, transport measurement and energy consumption for inland transport. It provides standard definitions for statistical terms.

Terminology on Combined Transport
Prepared by the UN-ECE, ECMT and the European Commission

Social Costs Glossary
Paris, 1997

List of Descriptors in Transport Economics, 4th Ed
Paris, 1989, Trilingual

out of print
3 - TITLES INDEX

50 Years of Transport Research: Experience Gained and Major Challenges Ahead .............................................. 11
Access to Air Travel for Persons with Reduced Mobility ..................................................................................... 18
Access to European Transport Markets .......................................................................................................... 19
Activities of the Conference ................................................................................................................................. 19
Aims and Effects of Public Financial Support for Passenger Transport ............................................................... 22
Airports as Multimodal Interchange Nodes ......................................................................................................... 22
Annual Report .................................................................................................................................................... 23
Application of Modern Methods to the Choice of Investment Projects .............................................................. 26
Assessing the Benefits of Transport ................................................................................................................ 26
Assessment and Decision Making for Sustainable Transport ............................................................................ 26
Basic Problems of Urban Transport Economics ................................................................................................ 26
Benefits and Costs of Government Intervention in the Normal Process of Setting Freight Transport Prices ...... 27
Benefits of Different Transport Modes .............................................................................................................. 27
Changes in Transport Users' Motivations for Modal Choice: Freight Transport ............................................... 28
Changes in Transport Users' Motivations for Modal Choice: Passenger Transport ........................................ 28
Changing Daily Urban Mobility ......................................................................................................................... 28
Changing Patterns of Urban Travel .................................................................................................................. 28
Charging for the Use of Urban Roads ................................................................................................................ 29
Charter on Access to Transport Services and Infrastructure .......................................................................... 29
Choice of Mode of Transport ............................................................................................................................. 30
Cleaner Cars: Fleet Renewal and Scrappage Schemes ....................................................................................... 30
CO2 Emissions from Transport .......................................................................................................................... 30
Combined Transport: Hearing of Combined Transport Organisations and Companies ............................... 30
Communication in Road Safety ......................................................................................................................... 30
Competitive Position and Future of Inland Waterway Transport ..................................................................... 31
Competitive Tendering of Rail Services ............................................................................................................. 32
Container Transport Security across Modes ..................................................................................................... 32
Contribution of Economic Research to Transport Policy Decisions (The) ......................................................... 32
Cost of Combined Transport (The) .................................................................................................................... 33
Cost of Using a Car (Perception and Fiscal Policy) ............................................................................................ 33
Cost-Benefit Analysis ........................................................................................................................................ 34
Costs and Benefits of General Speed Limits (Maximum and Minimum Speeds) ............................................. 34
Costs and Benefits of Road Safety Measures ................................................................................................ 34
Crime in Road Freight Transport ..................................................................................................................... 35
Current State of Combined Transport in Europe (The) .................................................................................... 35
Cutting Transport CO2 Emissions: What Progress?? ....................................................................................... 35
De / Regulation of the Taxi Industry ................................................................................................................ 36
Delinquency and Vandalism in Public Transport ............................................................................................... 36
Demand for Freight Transport: Practical Results of Studies on Market Operation ......................................... 36
Deregulation of Freight Transport .................................................................................................................... 36
Determination of Elasticities of Demand for the Various Means of Urban Passenger Transport ................ 36
Economic Aspects of Taxi Accessibility ........................................................................................................... 36
Economic Criteria for Determining the Capacity .............................................................................................. 36
Economic Criteria for the Maintenance, Modification or Creation of Public Transport Services ................ 36
Economic Evaluation of Road Traffic Safety Measures ..................................................................................... 37
Economic Problems of Traffic Peaks .............................................................................................................. 37
Economic Prospects for Railways .................................................................................................................... 37
Economics of Transport – Prospects and Orientation .................................................................................... 37

Last revised March 2010
Effect of Productivity and Technological Progress on Transport Workers .................................................. 19
Efficient Participation of the Railways in the Market Economy (The) .......................................................... 20
Efficient Transport for Europe ...................................................................................................................... 41
Efficient Transport Taxes and Charges ......................................................................................................... 26, 40
Elaboration of Models for Forecasting Demand and Need in the Transport Sector ........................................ 21
Electronics and Traffic on Major Roads ........................................................................................................ 42
Employment in Transport ............................................................................................................................... 17
Environment and Transport Infrastructures .................................................................................................... 17
Estimation and Evaluation of Transport Costs ............................................................................................... 13
European Conference of Ministers of Transport, 1953-1993 ........................................................................ 6
European Dimension and Future Prospects of the Railways ........................................................................ 31
European Integration of Rail Freight Transport .......................................................................................... 14, 26
European Integration of Road Freight Transport, Signs and Signals ............................................................ 45
European Transport Trends and Infrastructural Needs .................................................................................. 38
Evaluating Investment in Transport Infrastructure ....................................................................................... 16
Evaluation of Past and Future Transport Policy Measures (The) .................................................................... 12
Exchange of Information on Investment Criteria Applied to Transport Infrastructure Projects .................. 39
Express Delivery Services ............................................................................................................................... 15
Fifty Years of Transport Policy: Successes, Failures and New Challenges ..................................................... 22
Final Act -- Protocol -- Rules of Procedure .................................................................................................... 6
Forecasts for the Ownership and Use of a Car ................................................................................................. 18
Foreseeable Cost Trends in Different Modes of Freight Transport ............................................................... 17
Frequency of Traffic and Delivery in Urban Areas ......................................................................................... 19
Frequency Transport and the City .................................................................................................................. 15
Freight Transport and the Environment ......................................................................................................... 27
Future of European Passenger Transport (The) ............................................................................................. 29
Future of the Use of the Car (The) .................................................................................................................. 18
General Transport Plans: Methods, Gaps and Prospects ........................................................................... 19
Glossary for Transport Statistics .................................................................................................................. 8, 49
Goods Distribution Systems in Urban Areas ................................................................................................. 18
Guide for Government Officials and Carriers on the Use of ECMT Multilateral Quota ................................. 32
Guided Transport in 2040 ................................................................................................................................ 31
High Speed Trains ......................................................................................................................................... 16
High-Speed Traffic on the Railway Network of Europe .................................................................................. 31
Holiday Traffic ................................................................................................................................................ 19
Impact of High Speed Ground Transport on Demand .................................................................................. 20
Impact of Infrastructural Investment on Economic Development (The) ...................................................... 21
Impact of Infrastructural Investment on Industrial Development .................................................................. 20
Impact of the Structure and Extent of Urban Development on the Choice of Modes of Transport .............. 19
Implementing Sustainable Urban Travel Policies. Final Report ................................................................ 23, 36, 40
Implementing Sustainable Urban Travel Policies. Key Messages for Governments ..................................... 23, 36, 40
Implementing Sustainable Urban Travel Policies. National Peer Review: Hungary .................................... 22, 36, 40
Implementing Sustainable Urban Travel Policies. National Peer Review: The Netherlands ...................... 23, 36, 40
Implementing Sustainable Urban Travel Policies. National Policies to Promote Cycling ........................... 22, 36, 40
Implementing Sustainable Urban Travel Policies. National Reviews ............................................................ 23, 36, 40
Improvement of Statistics on the Transport of Goods by Road in Countries in Transition ......................... 24
Improvements in International Railway Transport Services .......................................................................... 31
Improvements in Main International Piggyback Links .................................................................................. 35
Improving Access to Public Transport ........................................................................................................ 28, 46
Improving Access to Public Transport: Guidelines for Transport Personnel .............................................. 28, 46
Improving Access to Taxis .............................................................................................................................. 28, 46
Improving Transport Accessibility for All: Guide to Good Practice ............................................................ 28, 46
Improving Transport for People with Mobility Handicaps: A Guide to Good Practice .............................. 46
Indicators for Evaluating Transport Output ................................................................................................... 19
Influence of Cost, Quality and Organization of Terminal Transport and Interchanges on the Choice of ... 19
Influence of Measures Designed to Restrict the Use of Certain Transport Modes ....................................... 19
Influence of the Existing Transport Infrastructure on the Choice of Techniques to Provide Modern Urban and ... 20
